decades **fast forward**

made in ger ma ny

The KLOTZ company was founded in 1979, starting out as Europe's first specialist manufacturer of multicore, microphone and instrument cables. There followed a partnership for the manufacture of loudspeakers which can still be found in various buildings and facilities today. These speakers, built several decades ago, bear witness to the consistent and long-standing high quality of KLOTZ products.

As the years passed new markets were unlocked and the KLOTZ development engineers produced a never-ending flood of innovative ideas – as they still do today. The company's portfolio has long moved on from the idea of "just cables", and now includes systems and solutions for football stadiums, radio and TV broadcasters, mega-hotels and even cruise ships.

New standards are continually being introduced in data transmission. KLOTZ has always been in the forefront of this field, and will remain so in the future. The KLOTZ name is synonymous with supreme quality in audio and video transmission solutions, and the company has built a worldwide reputation on this hallmark quality.

Over the years KLOTZ has carried out a host of prestigious orders on the fiercely contested instrument and microphone cable market, including cabling for the legendary Abbey Road Studios in London and signature cable models for outstanding artists like TM Stevens, Matthias Jabs (Scorpions) and Joe Bonamassa.

As growth became necessary in recent years, the company was in the fortunate position of being able to expand its Vilchband production location. The facility was upgraded to take in future-facing technologies and other aspects – including legal requirements concerning areas like energy efficiency, as well as ergonomic and people-centred workplace design.

The company continues to be in the hands of its founders. They know that KLOTZ's most important asset is its people, who have collected a vast store of knowledge and expertise over the years. Our goal is to preserve and expand that knowledge. At KLOTZ, MADE IN GERMANY is our reality – and we aim to keep it that way for the next 40 years.

quality

The KLOTZ AIS factory is using a 6 time quality assurance for each KLOTZ cable in accordance with ISO 9001:2015.

Our extensive range of instrument cables has the ideal choice **for every need** - from ambitious entry-level players to professional stage and studio artists. All our cables are designed and produced to deliver the highest-quality transmissions and craftsmanship, from our Pro category to our top-end products - **the best that money can buy**.

qualities watch the stars!

supreme ★★★★★

Made in Germany. The extraordinarily elaborate construction and the best materials result in a cable that not only guarantees the best possible signal transmission, but also defines the limits of what is possible in terms of robustness.

high end ★★★★★

Made in Germany. Great neutral sound, yet extraordinarily robust. The signal is passed on unaltered, the stability makes these cables absolutely top quality in every respect.

professional ★★★★★

Made in Germany. Professional cables, a good choice for the rough and tough of everyday life on stage. The excellent shielding keeps the signal free from interference, the resistant jacket defies almost any mechanical stress.

TITANIUM **walnut**

supreme guitar ★★★★★

infinite tone - perfect silence

With its new revolutionary and patented design the TITANIUM delivers outstanding signal transmission. Maximum dynamics, transparency and transients combined with groundbreaking low microphonics for your perfect performance. Classy variant with laser-engraved walnut sleeves in satin finish and gold contacts.

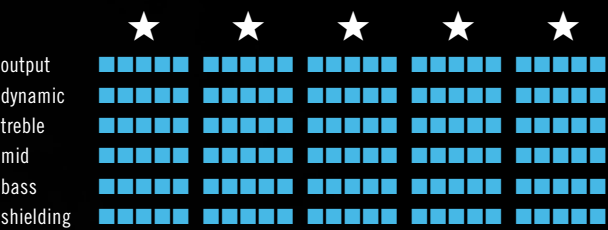

75
pF/m

features

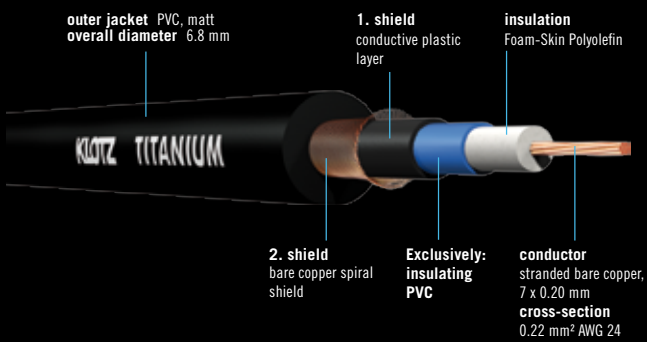

- US & EU patented
patent no: US 7,420,123 B2 - Sep. 2, 2008
- super dynamic
- ultra-low capacitance 75pF/m or 23 pF/ft
- ultra-low signal compression
- maximum signal transparency and transients
- outstanding optimized sound quality
- high-quality 99.95 per cent copper conductor
- physically foamed PE insulation
- separating layer to optimize signal
- highly conductive PE screen

65
pF/m

ultra low capacitance - triple shielded

A market classic since 1985, this cable features extremely low capacitance of 65 pF/m, resp. 20 pF/ft, an ultra-rugged cable jacket and provides groundbreaking and warm sound reproduction because of its outstanding signal transmission with gold plated contacts.

features

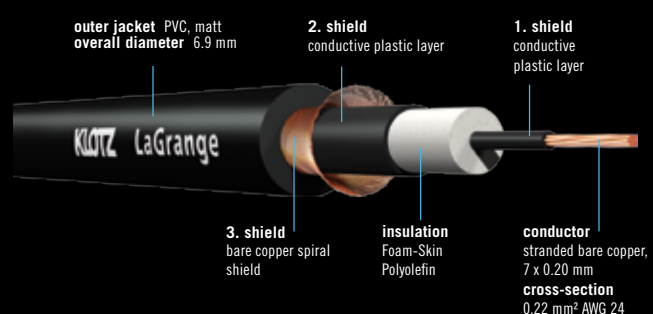

- high-quality copper core (99.95% pure ETP copper)
- lead-free ultra-durable jacket, highly resistant
- extra conductive plastic layer shield
- extra-thick dielectric for ultimate conductor insulation
- lowest possible microphony
- outstanding signalflow and groundbreaking fidelity
- extremely low capacitance – 65 pF/m, resp. <20 pF/ft

Joe Bonamassa

high end guitar ★★★★★☆

70
pF/m

powerful & transparent sound

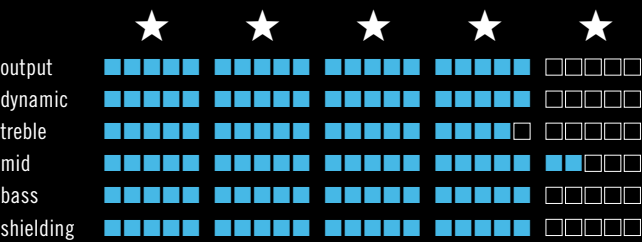

This high end signature cable designed for Joe Bonamassa is just like Joe himself, delivering brilliant yet utterly natural sound. A direct result of extremely low capacitance of 70 pF/m, resp. 21 pF/ft, negligible microphonics and unbeatable neutrality.

features

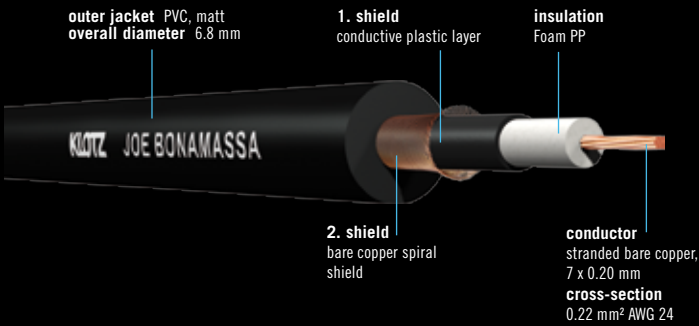

- artist designed JB cable
- high-quality copper core (99.95% pure ETP copper)
- ergonomic anti-kink design guarantees outstanding cable protection
- lead-free, ultra-flexible jacket
- outstanding mechanical resilience
- double screening with conductive layer
- outstanding transparency, unbeatable neutrality and fidelity
- ultra-low capacitance – 70 pF/m, resp. 21 pF/ft

Joe Bonamassa

Without the shadow of a doubt, Joe Bonamassa is among the brightest stars in the universe of fine music. KLOTZ is naturally delighted and honoured to have this figurehead of the international blues and rock scene on board as an endorser, and even as one of our Signature Artists.

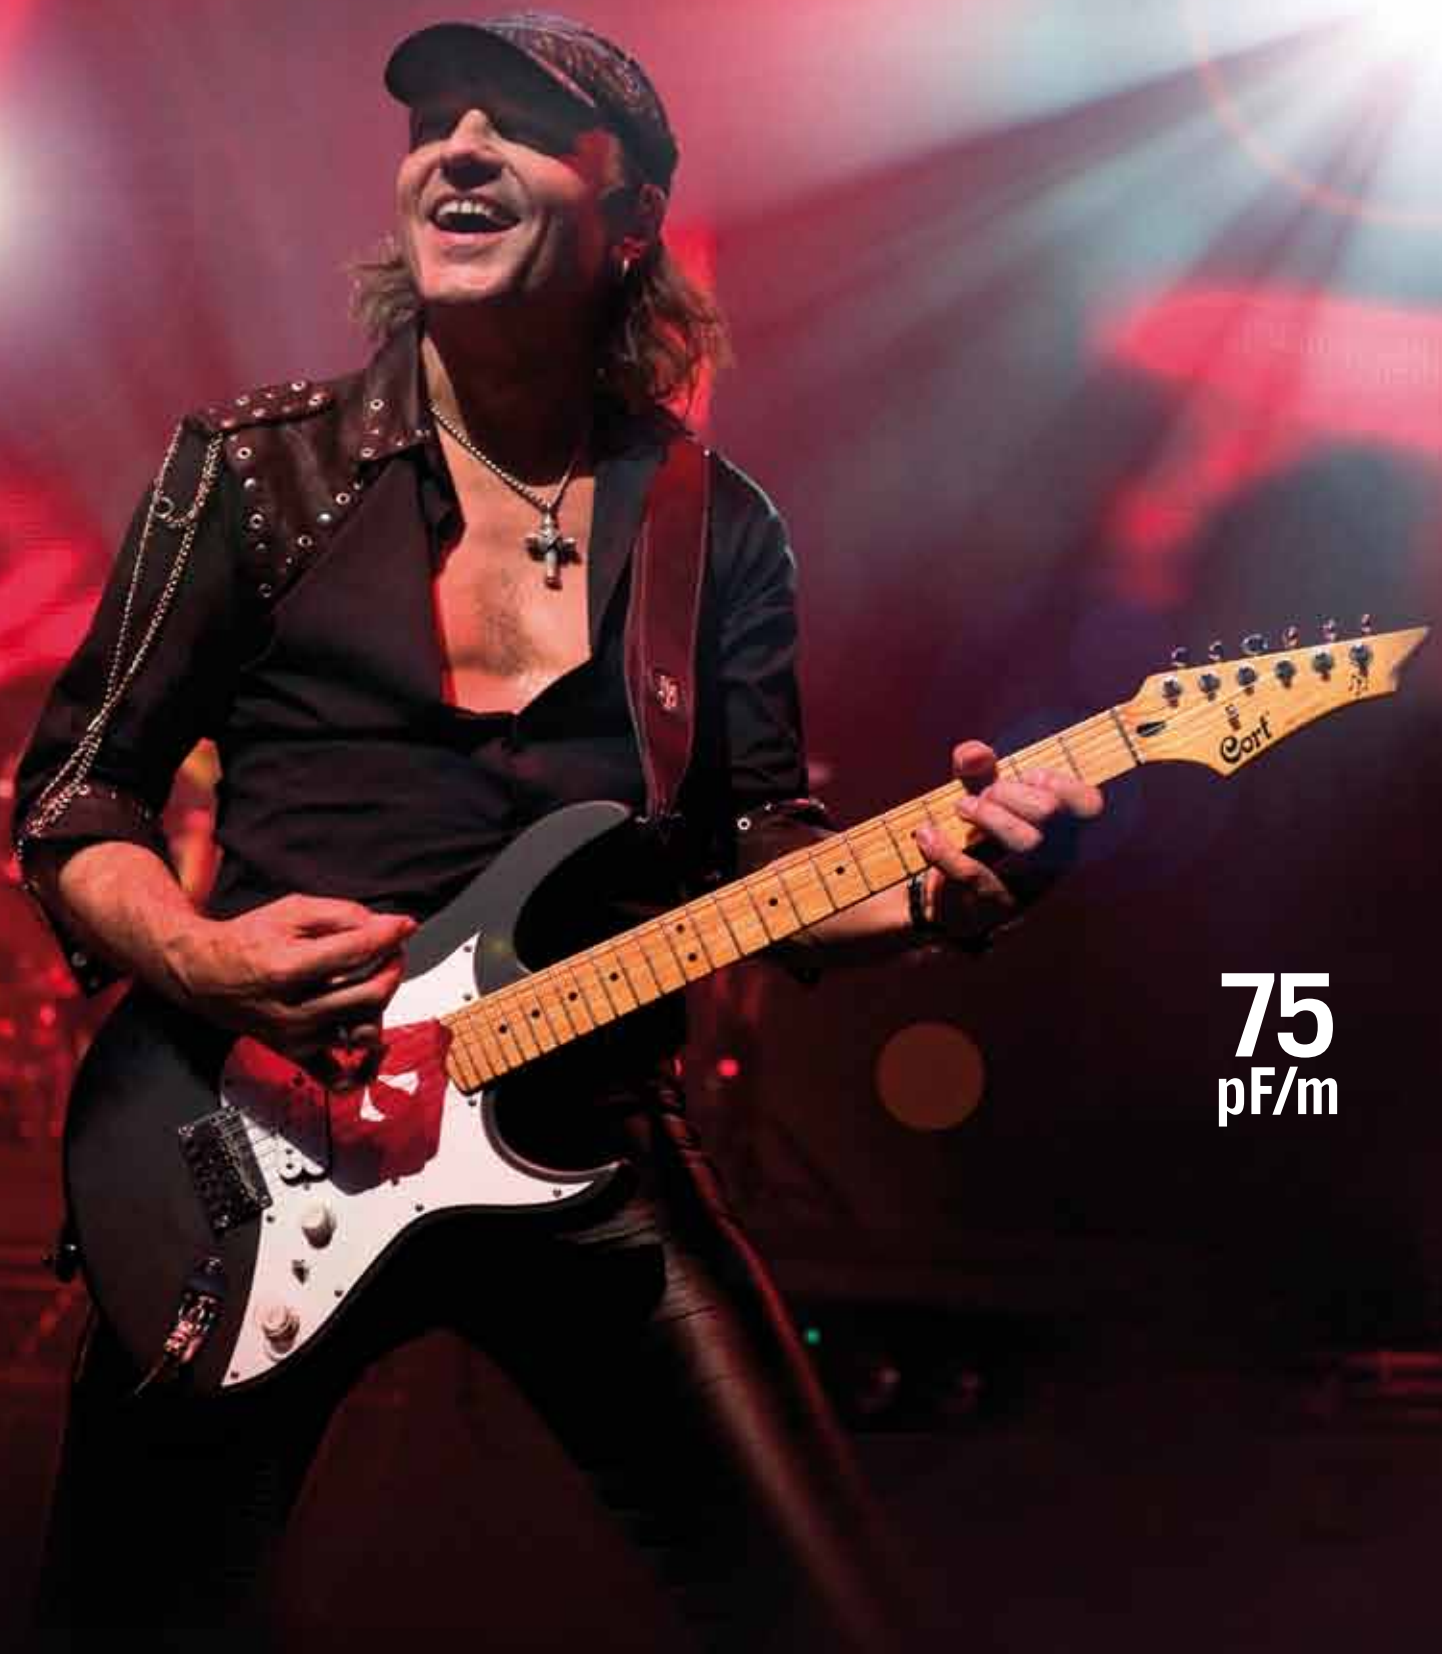

The relationship between the US musician and KLOTZ began over a decade ago. He found exactly what he was looking for at KLOTZ. With a little help from friends of friends, direct contact with the company was set up, and both sides quickly decided to start working on a signature cable.

Joe Bonamassa has gourmet tastes in sound. It was clear from the start that he would have very specific and personal ideas of the sound he wanted. At the same time, the cable would have to offer all the reliability that a musician who spends a good part of his life on the road has come to expect from his equipment. A further factor to consider was that the blues giant plays the biggest stages in the world – but never uses wireless technology. So his cables had to deliver superb sound quality even in extremely long lengths. Confronted with these requirements, the KLOTZ engineers embarked on a phase of testing and experimentation.

Joe Bonamassa was immediately attracted by the warmth and clarity of the cable's sound. After a few tweaks, engineers and artist agreed over this aspect. The next step was to work on the visuals of the cable jacket and redesign the jack connectors for use with Bonamassa's beloved vintage guitars. Some time ago a version with Silent Plug connectors was added, enabling performers to make the many guitar changeovers required during a concert with no need for a changeover or mute switch. Joe Bonamassa has now been using his KLOTZ Signature Cables for many years and is completely satisfied with their sound, reliability and durability.

Klotz and Matthias Jabs join forces!

Matthias Jabs, legendary lead guitarist of super-group "Scorpions" and member of the "Rock'n Roll Hall of Fame" took the opportunity to design a high-end cable range that exactly matched his high standards. He did it with his chosen partners, KLOTZ Cables - international cable specialists, with top marks in an array of international tests and comparisons and leading designers and producers of ultra-high-quality cables, connectors and connection systems.

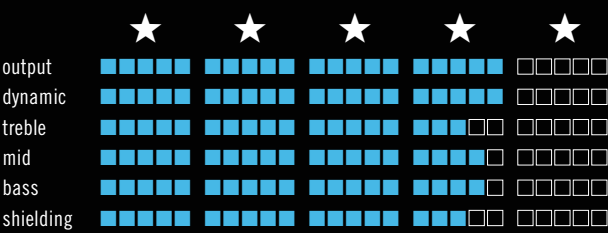

The cable for rock musicians!

Offers fast response and a powerful, transparent and assertive sound. Ideal for electric guitars' mid-heavy frequencies. Also available as speaker and patch cables. It's interference-free and comes with an optimized ultra-low capacitance of 75 pF/m, resp. 23pF/ft.

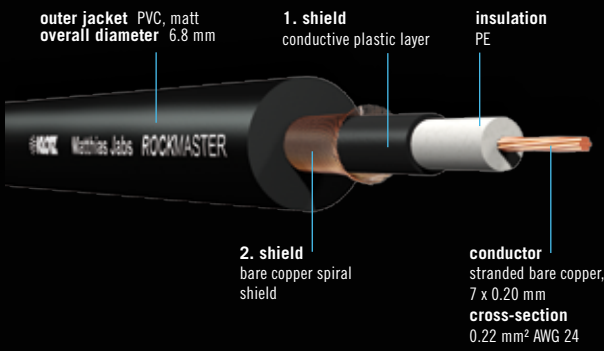

features

- THE cable for rock musicians
- fast response
- delivers a powerful, transparent and assertive sound
- interference-free
- top-quality materials: PVC jacket, Cu spiral shield
- ideal for electric guitars' mid-heavy frequencies
- also available as speaker and patch cables
- ultra-low capacitance (75 pF/m)

funky & percussive response

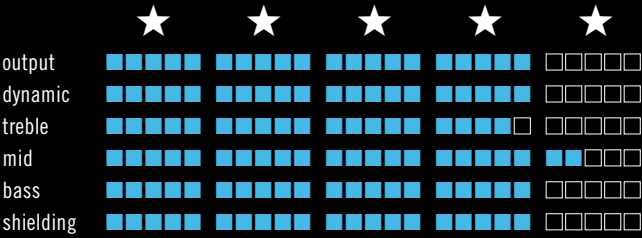

This high end bass and guitar cable offers maximum transparency, clearly defined low end and funky, percussive response. It is extra-flexible, resistant to interference, great to handle and comes with an ultra-low capacitance of 80 pF/m, resp. 24pF/ft..

features

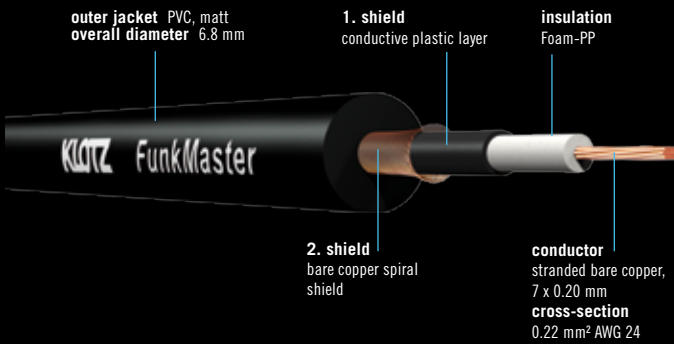

- ideal for both bass and guitar
- high-quality copper core (99.95% pure ETP copper)
- extra-dense outer surface improves handling
- ultra-flexible, ultra-durable
- higher thickness dielectric for extra conductor insulation
- maximum transparency
- ultra-low compression
- outstanding capacitance specs - 80pF/m, resp. 24 pF/ft

TITANIUM

supreme microphone cable ★★★★★

StarQuad microphone cable ultra low capacitance

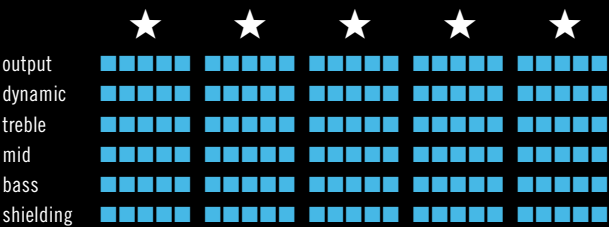

You deserve the best, regardless whether you are on stage or in a recording studio environment. The four-conductor TITANIUM Microphone cable delivers outstanding fidelity with the best noise rejection and suppression.

features

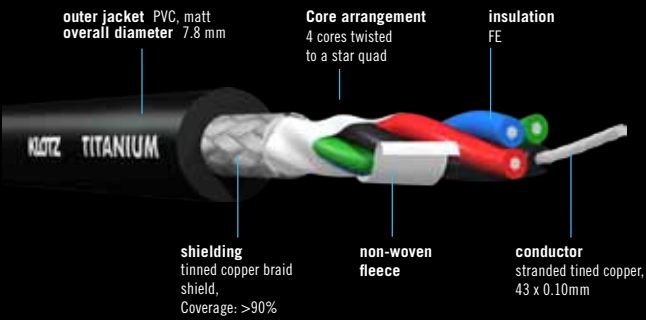

- Outstanding, excellent sound quality
- Interference-free sound transmission due to 4 conductor StarQuad wiring
- High-quality 99.95% pure ETP copper
- Optimized conductor cross section with the lowest capacitance
- Extremely dense spiral shield for best rejection of any external sources
- Ultra-flexible
- Super dynamic
- Ultra-low signal compression
- Crystal-clear sound transmission
- maximum transients

supreme microphone ★★★★★

ultra-high cross section - double shielded

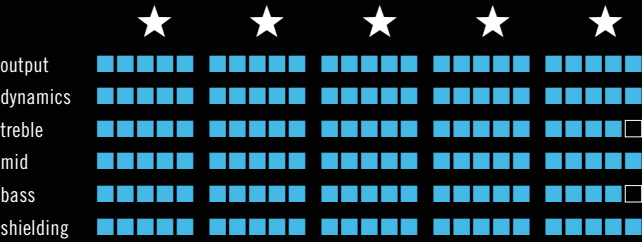

Reliable double counter-wound copper spiral shield, extremely low capacitance, a moulded PVC inner jacket and a conductor cross-section of 0.5 mm² (AWG 20) provide superb sound quality and long life span.

features

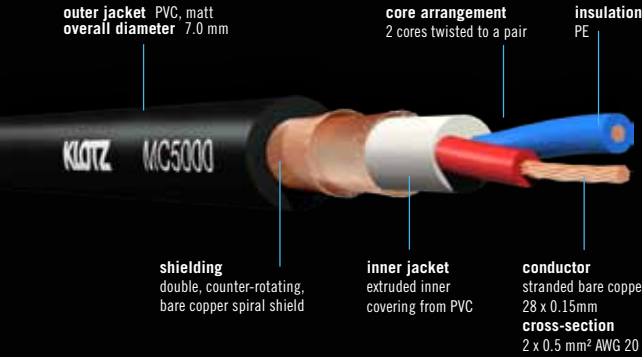

- superb sound quality in studios or on stage
- highly suitable for signal transmission over long distances
- 0.5 mm² conductor cross section (AWG 20)
- high-quality copper core (99.95% pure ETP copper)
- double counter-wound bare copper spiral shield
- PVC inner jacket for stabilizing pair twisting
- extremely low cond. capacitance 55 pF/m, resp. 16 pF/ft

high end microphone ★★★★★

extra thick touring grade cable

Robust microphone cable that withstands daily touring business easily: superb flexibility, extra thick outer jacket, ultra-low cond. capacitance 60 pF/m, resp. 18 pF/ft, conductor cross-section of 0.22 mm² for top performance.

features

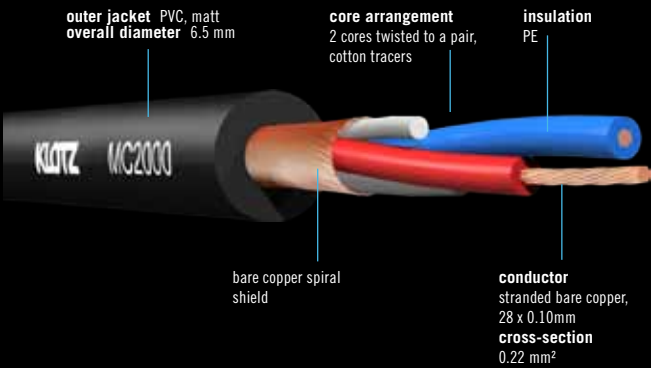

- highly flexible
- 0.22 mm² cond. cross section (AWG 24)
- high-quality copper core (99.95% pure ETP copper)
- most effective copper shielding
- lead-free PVC coating
- cond. capacitance 60 pF/m, resp. 18 pF/ft
- successfully tested with > 25.000 bendings

professional microphone ★★★★★

ultra lightweight & durable XLR cable

Although the KMK microphone cable was designed for price-conscious users, it meets the high standards that are characteristic of KLOTZ cables. The high-quality, durable cable features a sophisticated combination of materials that optimises signal transmission. The Neutrik compound connector, manufactured exclusively for KLOTZ, is approx. 40% lighter than standard Neutrik XLR connectors with similar stability.

features

- super flexible
- 0.22 mm² cond. cross section (AWG 24)
- high-quality copper core (99.95% pure ETP copper)
- efficient copper shielding
- lead-free PVC coating
- cond. capacitance of 60 pF/m, resp. 18 pF/ft
- successfully tested with > 25.000 bendings

M1

professional microphone ★★★★★

ultra flexible - low capacitance
with Neutrik connectors

Rugged and durable as well as highly flexible. Vocal signals are reproduced as naturally and reliably as possible, even under challenging stage and rehearsal conditions.

features

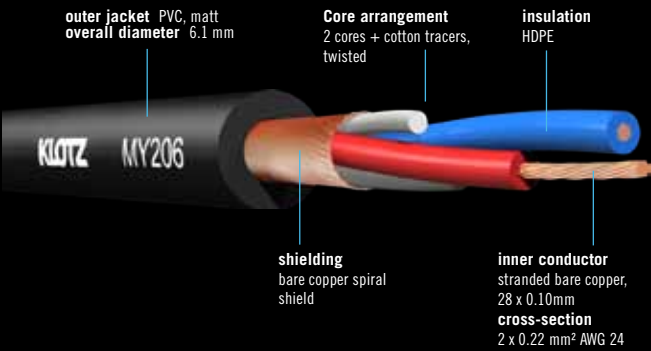

- highly flexible
- 0.22 mm² cond. cross section (AWG 24)
- high-quality copper core (99.95% pure ETP copper)
- most effective copper shielding
- lead-free PVC coating
- cond. capacitance 60 pF/m, resp. 18 pF/ft
- successfully tested with > 25.000 bendings

speaker cables

speaker cables

The supreme range from KLOTZ AIS presents cable products designed for secure low-loss signal transmission even over long distances. Their design and production comply with the highest standards of perfection, stability and flexibility, guaranteed by their ultra-short twisting length and extra-fine stranded copper wires (224 x 0.15 mm).

SC5

supreme speaker ★★★★★

supreme speaker cable - 2 x 4.0 mm² with speakON F-F

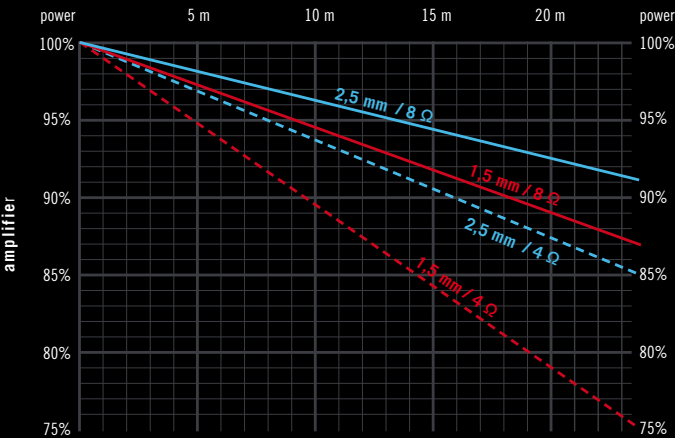

Supreme speaker cable for superb sound. The SC5 meets the highest standards of transmission quality and ruggedness in the pro sector.

features

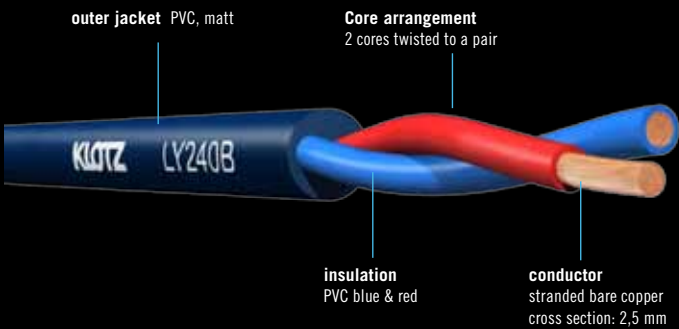

assembled with the supreme speaker cable LY240

- extra-short twisting length for improved EMC
- high-quality ETP pure copper cores (99,95%)
- extra-fine stranded copper wires (224 x 0.15 mm)
- 4.0 mm² conductor cross section (AWG 11)

SC3

high end speaker ★★★★★

high end speaker cable - 2 x 2.5 mm²

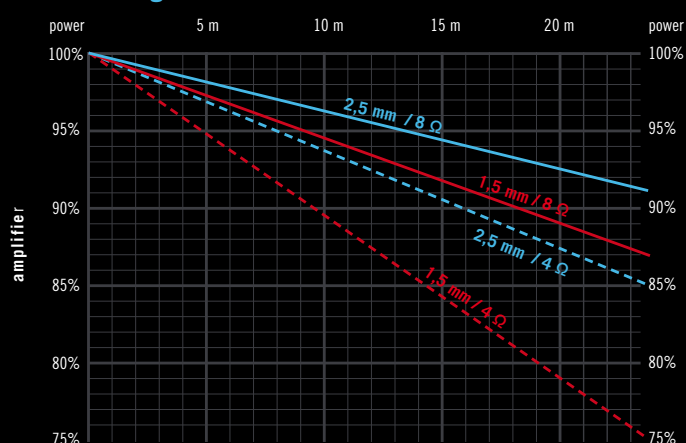

High-end speaker cable for superior demands. No sound coloring. Outstanding flexibility and ruggedness. Built for the hard life on tour.

features

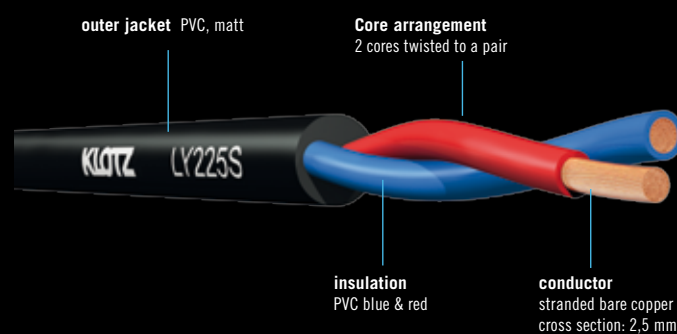

- assembled with the high-end speaker cable LY225
- improved EMC performance by short length of core twist
- high-quality ETP pure copper cores (99,95%)
- 50 x 0.25 mm stranded design conductors
- 2.5 mm² conductor cross-section (AWG13)

SC1

professional speaker ★★★★★

professional speaker cable
- 2 x 1.5 mm²

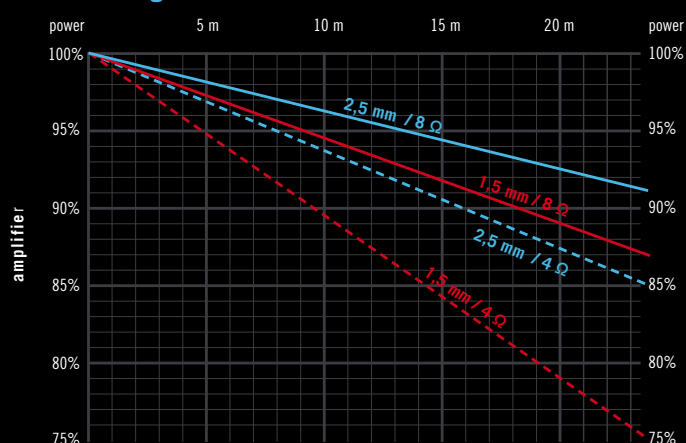

The SC1 delivers YOUR sound to the speaker. Super flexible but yet very durable.
Build for professionals.

features

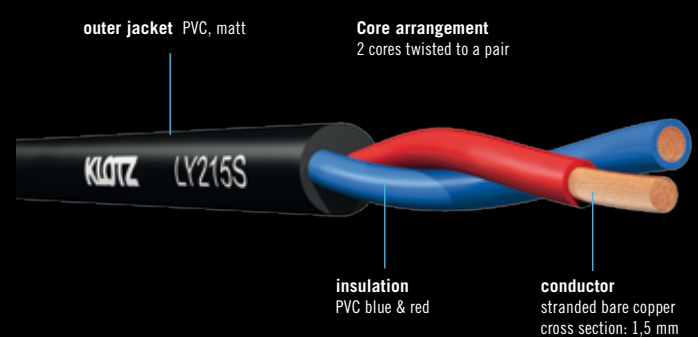

- assembled with the professional speaker cable LY215
- improved EMC performance by short length of core twist
- high-quality ETP pure copper cores (99,95%)
- 30 x 0.25 mm stranded design conductors
- 1.5 mm² conductor cross-section (AWG15)

environment responsibility

As an internationally operating company, we believe that responsibility for our environment and conservation of resources is our task and our duty for the present and future generations.

As manufacturers of outstanding ground-breaking products, we have adopted a pioneering role in environmental protection and conservation as a matter of utmost priority. In our view, the use of low-toxicity raw materials and the minimization of our ecological footprint is not only an urgent necessity, but also an honourable duty.

We therefore introduced compliance with the terms of the EU's RoHS (Restriction of Hazardous Substances in Electrical and Electronic Equipment) directive in our company many years ago, long before it actually came into force; our suppliers can vouch for the RoHS compliance of the connectors we use.

We have significantly lowered our carbon emissions (with certificate), and ensured that our new production hall has improved insulation in line with the German Energy Saving Ordinance ENEC from 2009.

These measures ensure that we contribute towards protecting the environment.

The RoHS Directive, or the directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment 2002/95/EC' was adopted in January 2003 by the European Parliament and European Council and was implemented into German national law in March 2005.

The aim of the Directive is to minimize risks to people and the environment by reducing toxins in the production, use and disposal of electrical and electronic

products. It has therefore prohibited the use of lead and other toxic heavy metals including mercury, cadmium and hexavalent chrome and of flame-retardants such as PBB (polybrominated biphenyls) and PBDE (polybrominated diphenylether) in electrical and electronic products such as household appliances,

IT and telecommunications devices and consumer electronics.
