Cases & Gig Bags

Our Story

In 1977, two ambitious college students developed the first SKB case in a small Anaheim, California garage. Today, SKB Cases is known around the world as the leading innovator and manufacturer of the finest musical instrument and equipment cases. Since the inception of our company, in addition to SKB branded products, leading companies have proudly supplied SKB cases for protection of their own products. SKB builds cases for four different major markets (Music/Pro AV, Sports, Industrial and Military) and that diversity allows us to be more creative and innovative in our case designs across the board. We have a true sense of accomplishment for more than 35 years of steady growth and for an adherence to quality standards that has made us industry leaders. We never lose sight of the fact that our customers give us the opportunity to excel and we are grateful for their trust and loyalty. We remain dedicated to the assurance that every case with a SKB logo has been manufactured with an unconditional commitment to unsurpassed quality.

One of our Injection Molders in action

Injection-Mold *i series*

This is SKB's latest venture in our quest to provide the most innovative hard shell case products. Injection molding is an expensive investment and there is no room for error. Made with extreme pressure, even the smallest injection molded part requires a very large and heavy mold. SKB has molds that weigh almost 30,000lbs! Many of our parts, such as our patented trigger latches are produced by the injection mold process. Our iSeries cases include a gasket that makes the case watertight and dust proof. Our latest injection molded cases for guitars and basses are very popular with touring musicians. These cases have dual lives as they are also used for military weapons. Never before has an ATA flight case been so lightweight, yet so advanced.

Pictured: Molds rotating during production.

Roto-Mold

In 1997, SKB invested in roto-mold machinery that is ideal for making larger cases and cylindrical cases. The PE* roto-mold material starts as a fine powder that is measured according to the size of the case. The material is then sealed up in a multi-piece aluminum mold and fixed on a biaxial rotating wheel. The material is heated at 800 degrees in a very large oven while constantly rotating. The powder melts and coats the inside of the mold and after cooling, the cast is disassembled and the case is removed. Roto-Molding is great for providing maximum protection and can withstand maximum impact in transport.

*Polyethylene (PE)

Pictured: Vacuum mold for keyboard case.

Vacuum-Form

Also known as thermal form, this was the first and most recognized "SKB Style" case. This method is very popular for guitar or band instrument cases. In 1990, SKB developed the first vacuum formed rack case. ABS* or PE* is formed into solid sheets of material. The sheets are heated and are vacuum formed around aluminum castings, thus taking the shape of the mold. The edges have the distinctive aluminum valance that provides rigid construction as well as a secure fit. Vacuum formed products are known for their light weight and extreme durability.

*Acrylonitrile Butadiene Styrene (ABS), Polyethylene (PE)

Guitar & Bass Cases

iSeries Injection Molded Watertight Cases

- High-Strength, lightweight, Injection Molded Polypropylene Copolymer Resin
- Watertight gasket seal
- Easy to use TSA locking trigger latches
- Convenient quiet-glide wheels
- Plush lined EPS molded interior
- Comfort grip rubber over-molded handles
- Self-Sealing large accessory compartments
- Secure stackable design
- Automatic Pressure Equalization Valve
- Lifetime Warranty

Cello Cases

SKB offers a variety of Cello cases that are perfect for any situation. From a soft-sided case to a rugged roto-molded shell, each case provides superior protection. The 1SKB-544 is an extremely durable roto-molded shell with two internal nylon bow pockets and separate rosin pockets. In-line skate wheels and ergonomically placed sure-grip handles make for easy transport. The 1SKB-344, a vacuum formed shell, includes a molded, plush-lined EPS interior to securely hold instruments in transport. A molded internal pocket cover provides full neck support. The 1SKB-SC344 shares the same interior as the 1SKB-344, but wrapped in a ballistic nylon outer cover.
