

LDE122

MULTI-FUNCTIONAL LOUDSPEAKER

The LDE122, fitted with selected Eminence components and a specially tuned crossover with a sophisticated protection circuit, was designed in response to customer demands for a high-quality, multifunctional loudspeaker cabinet.

A whopping 350 W RMS power and a high sound pressure level of 101 dB make the cabinet suitable for full-range applications, as a satellite counterpart to the LD PSUB15 subwoofer, as a powerful monitor, or in conjunction with other sub-woofers and systems. The cabinet is constructed entirely of 18 mm plywood; a highly durable black textured lacquer finish protects the cabinet against damage. The cabinet is rounded off by the use of the new, patented SM707 adjustable angle speaker stand receptacle with a variable vertical angle that adjusts in 4° increments to +/-18° as well as readiness for later installation of Adam Hall Flyware Set. The versatile LDE122 is virtually unbeatable in terms of value for money.

SPECIFICATIONS

Article No.:	LDE122
Nominal impedance:	8 Ω
Rated power capacity RMS:	350 W
SPL 1 W/1 m:	101 dB
Max. SPL 1 m (Cont. Prog.):	127 dB
Frequency range (-10 dB):	65 Hz - 18 kHz
Crossover frequency:	1.5 kHz
Connections:	2 x Speakon
Cabinet style:	18 mm Multiplex plywood
Dimensions (W x H x D):	390 mm x 570 mm x 370mm
Weight:	18,9 kg
